

# Cloud Backup for SharePoint and OneDrive for Business

## Data Protection Required for SharePoint and OneDrive for Business

32%

Data Loss in the Cloud

SharePoint and OneDrive have no archiving or expanded data protection features to recover lost data. With all you have invested in your data and 32% of companies reporting data loss in the cloud, a backup solution is critical for your business.<sup>1</sup>

## Data loss can be costly

Pepperdine University calculated the predictable cost per data loss to be **\$3,957<sup>2</sup>**. However, depending on the content loss, that cost could be higher and even more devastating to a business.

Value of Lost Data ●  
Technical Services ●  
Lost Productivity ●

## Data loss can be stressful

Just the thought of data loss is stressful. But it doesn't have to be. With a backup solution, instead of reacting in panic to a data loss event, you can instead quickly and simply restore that data and get back on track quickly.

## Causes of data loss in SharePoint and OneDrive for Business

## A Backup Solution

Pay a predictable, low, fixed monthly price per user to quickly and easily get your employees back on track

## YOUR OPTIONS

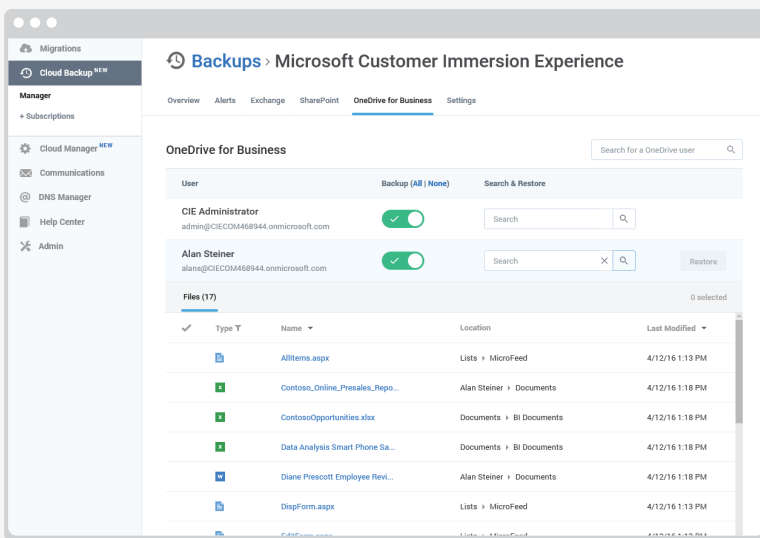

## No Backup Solution

Risk unpredictable and potentially devastating per-incident costs
